

STADRE
CUSTOM MADE FURNITURE

STADRE

/custom made furniture

We are a family business run by a father and two sons. We have been on the market since 2008, but the company's story began much earlier, i.e. in 1982, when the owner of the company, who was a treasure trove of carpentry knowledge, graduated from school with the title of carpenter. Knowledge, experience, a fresh outlook on furniture making, as well as continuous improvement of skills and implementation of the most complex and comprehensive projects, sets us apart from the competition and gives us an advantage right from the start.

We design furniture in CAD software, and transform the designs into finished furniture using Vitap's, Felder's, Holzher's, SCM's precision machines. Brothers with engineering degrees and certifications in the use of 3D CAD design programs will visualise each piece of furniture with accuracy to 1 mm.

We are also a certified furniture supplier using materials from manufacturers such as Blum, Hettich, Italiana Ferramenta, Egger, Pfleiderer, SwissKrono, Kronospan. The materials based on which our furniture is produced, i.e. boards, fabrics, accessories, etc., are manufactured in the European Union. The furniture we produce can have approvals and certificates for antibacterial surfaces, fire resistance, moisture resistance, quality, Environmental Product Declaration (EPD), Environmental and Health Datasheet (EHD), etc.

STADRE

HOW DO WE WORK

/pure joy of creation

Due to the diversity of requirements depending on the site and the use of specific furniture, we use boards, materials and accessories that meet the standards and certificates necessary to ensure compliance with the requirements of both investors and specific institutions that supervise, certify and authorise specific investment projects for public use. Our products are supplied with the necessary documentation proving that they are made of certified materials.

The furniture we produce can be personalised according to the investor's requirements, in which special attention is paid to the smallest detail. Design concept focuses on high quality and standards of furniture, materials and layout to ensure the highest ergonomics and comfort. Moreover, you can pick from a wide range of boards, fabrics, materials and accessories to be sure that everything will be prepared in accordance with your ideas, and we will be able to suggest logical and useful layout and internal arrangements based on our experience.

We can supply the furniture in packages as modules for self-assembly and arrangement by employees of external assemblers or employees of the investor's company, as well as furniture with assembly by a qualified Stadre assembly team at the agreed investment site. We specialise in implementing new investment projects, but our experience also includes delivery at facilities which are being renovated. We are experts in the manufacture and assembly of the following furniture for shipowners, developers, hotels, ports, airports, restaurants, bars, as well as individuals.

HEADQUARTERS

/Stargard, Poland

We are a Polish company. We carry out projects throughout Europe.

STADRE

/our projects

Take a look at some of our projects. Below is furniture made in accordance with the design guidelines and arrangements with investors to ensure perfect visual reception and furniture interiors that provide the highest ergonomics and comfort of use.

The aim of the project was to achieve a unique, elegant and representative interior.

Design with the aim of achieving a warm yet business-like interior for customer service.

5

6

Modern-style design in shades of graphite and anthracite.

7

Modern soft style design, with a dominance of warm white and natural wood colours.

10

Design of a 30m² apartment, elegant interior with provision of visual space.

Modern classic design with a focus on modern simplicity, elegance and timeless chic.

13

15

16

30m² space project in the 'urban jungle' style,
and inspired by sunny summer days in the city.

17

18

The assumption of the project was to create a warm loft, minimalistic and modern atmosphere.

19

20

Interior design conducive to relaxation and family time in cosy spaces.

21

The assumption of the project was to create a warm loft, minimalistic and modern atmosphere.

23

25

26

Classic style design with a contemporary twist, based on a bright design broken by gold and smoked mirrors.

27

28

29

30

The assumption of the project was to create a loft and minimalistic.

31

32

Design with a coastal feel in blue, sand beige and rattan.

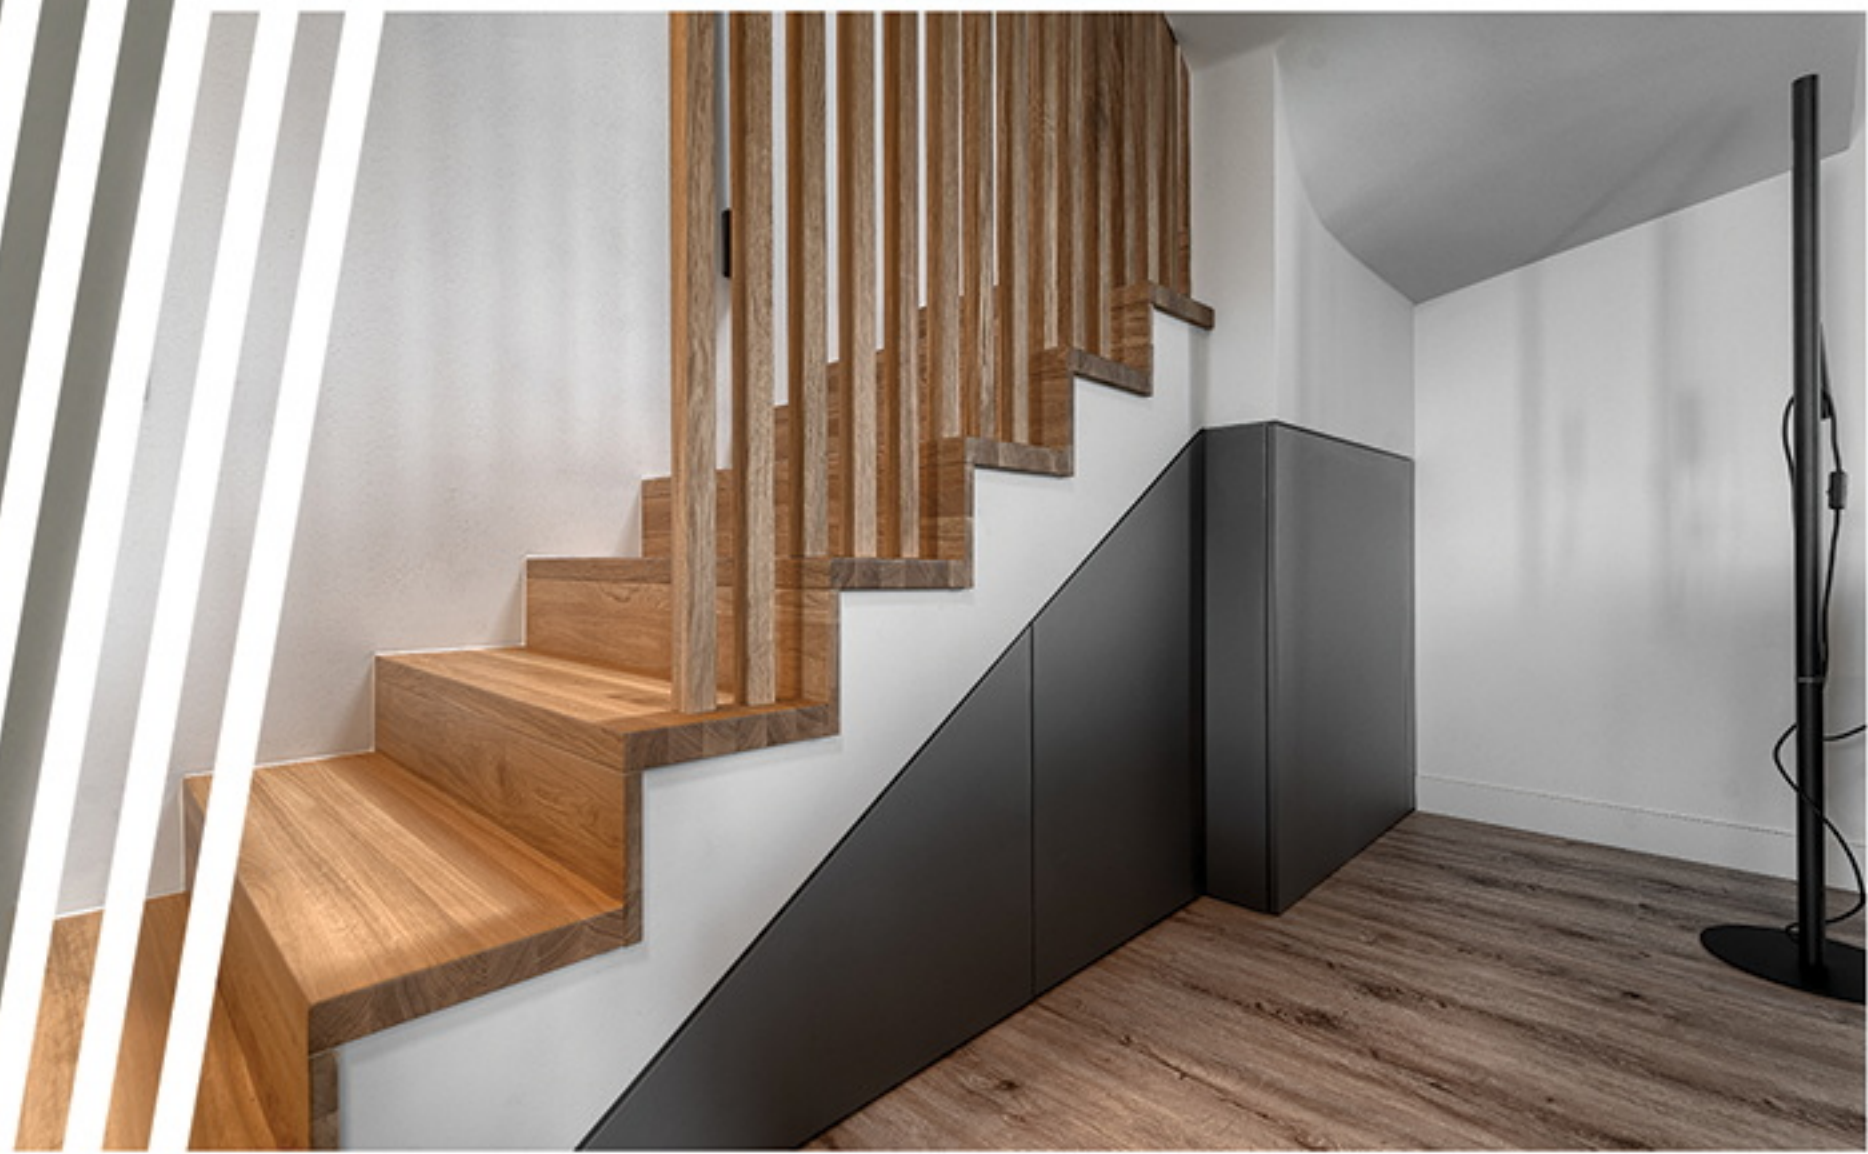

33

34

Minimalist design with a dark but atmospheric, calm and comfortable interior.

36

37

38

39

40

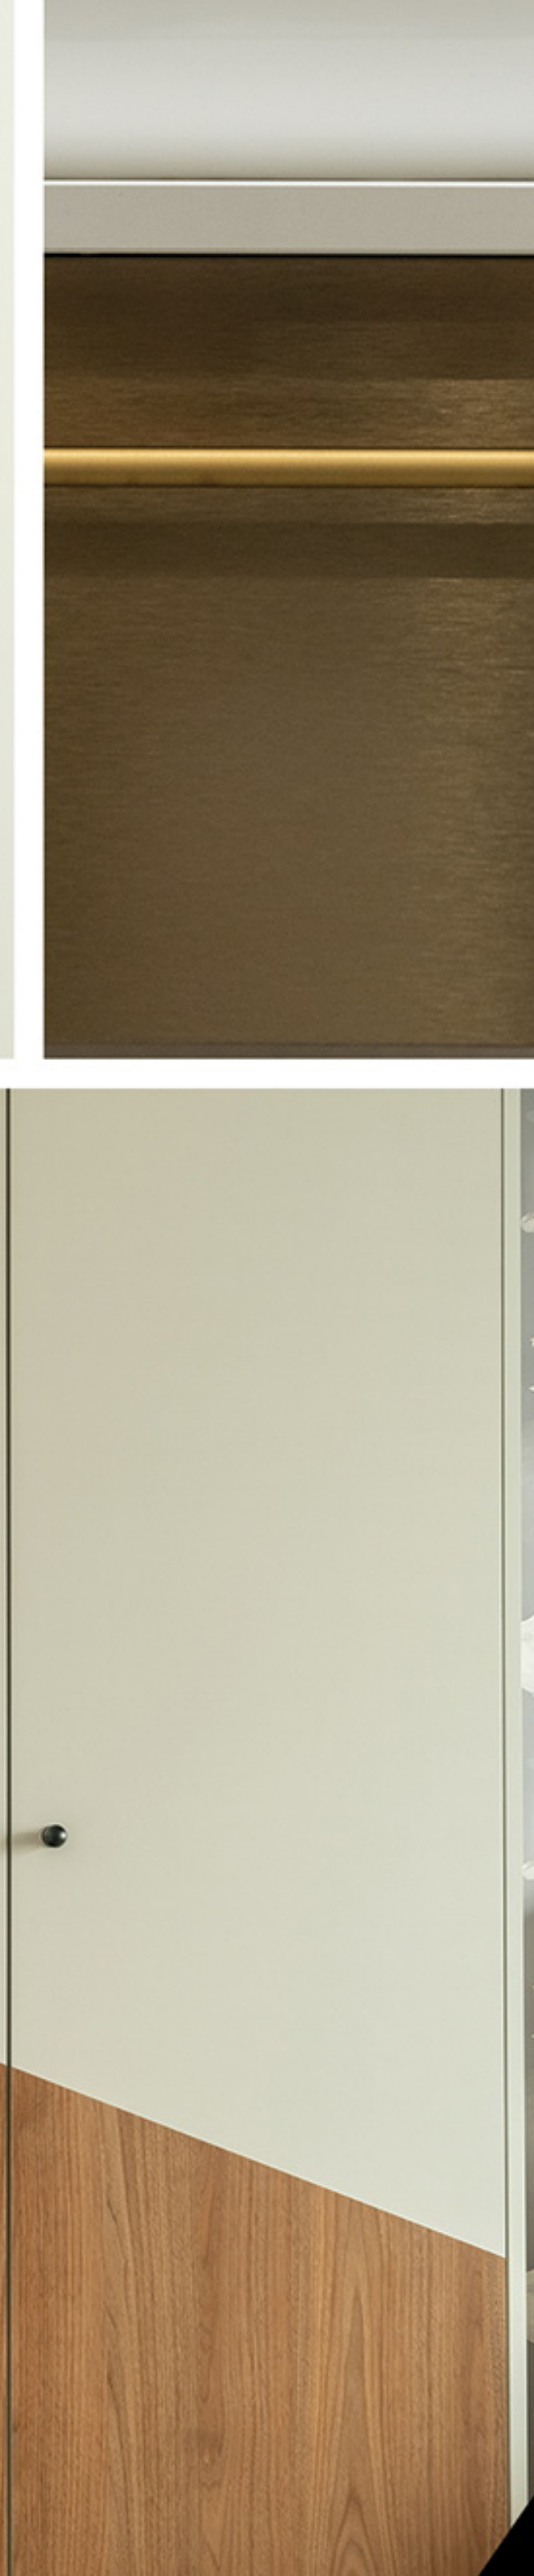

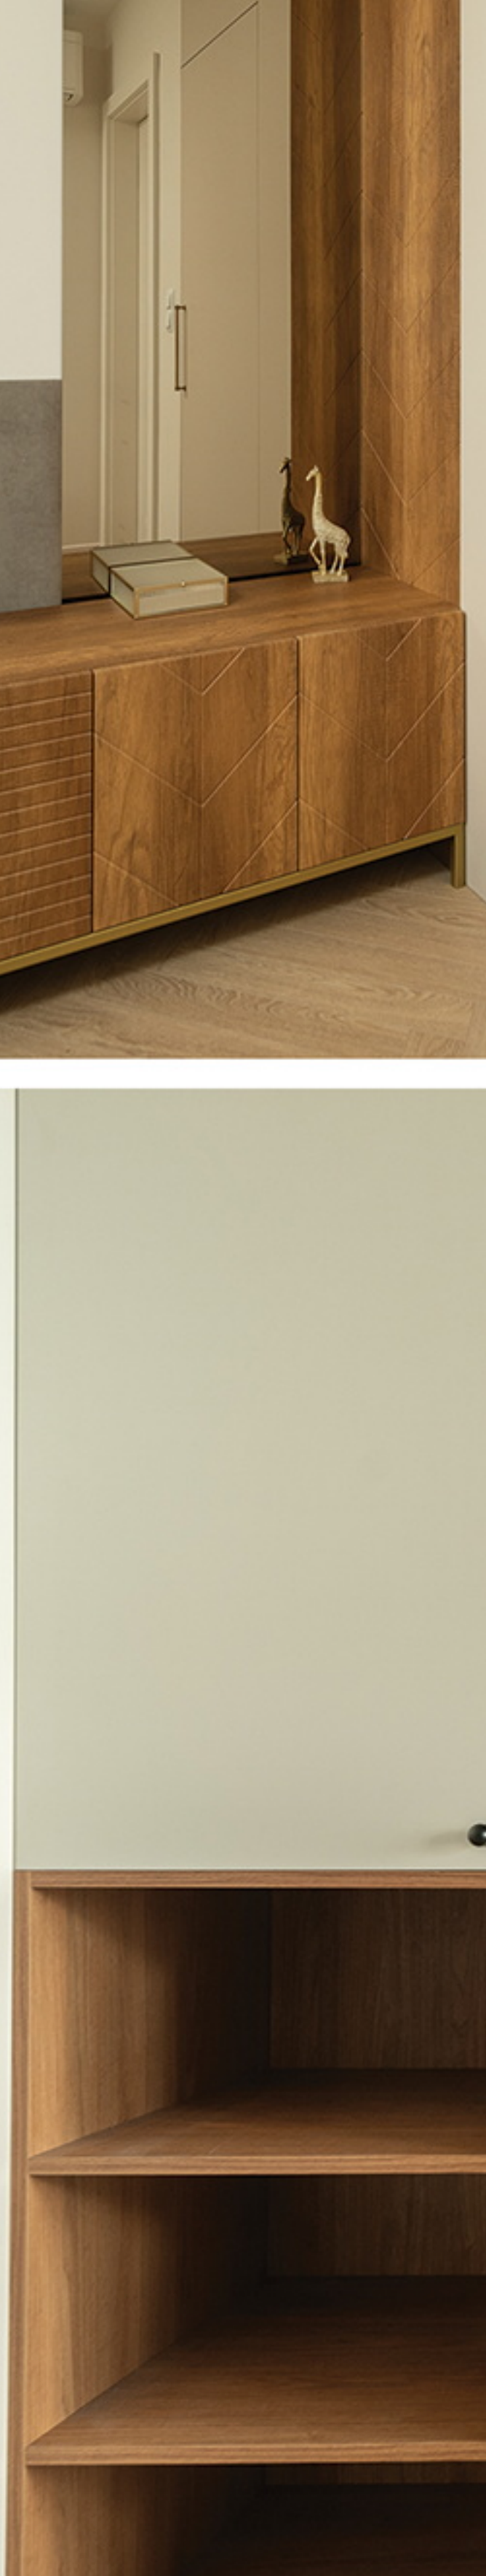

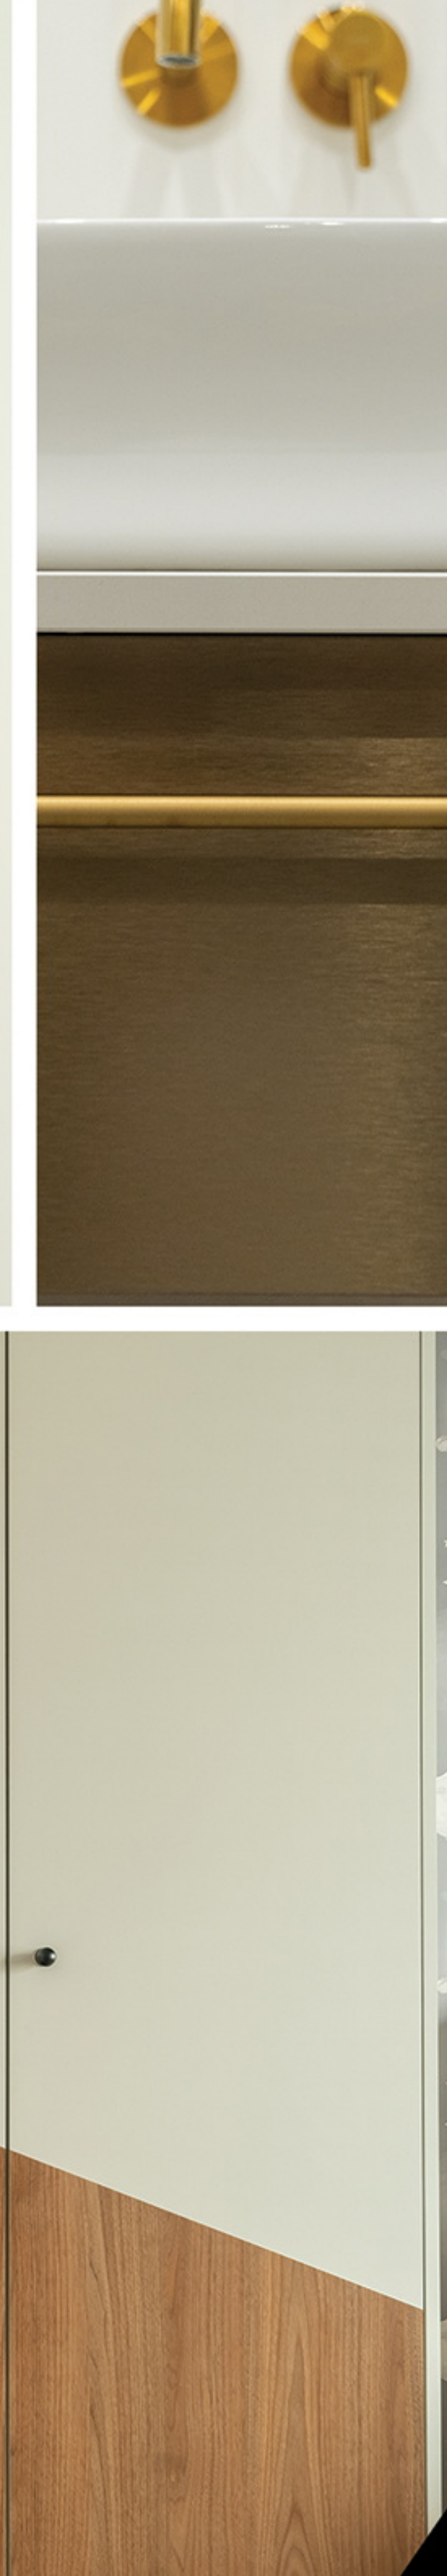

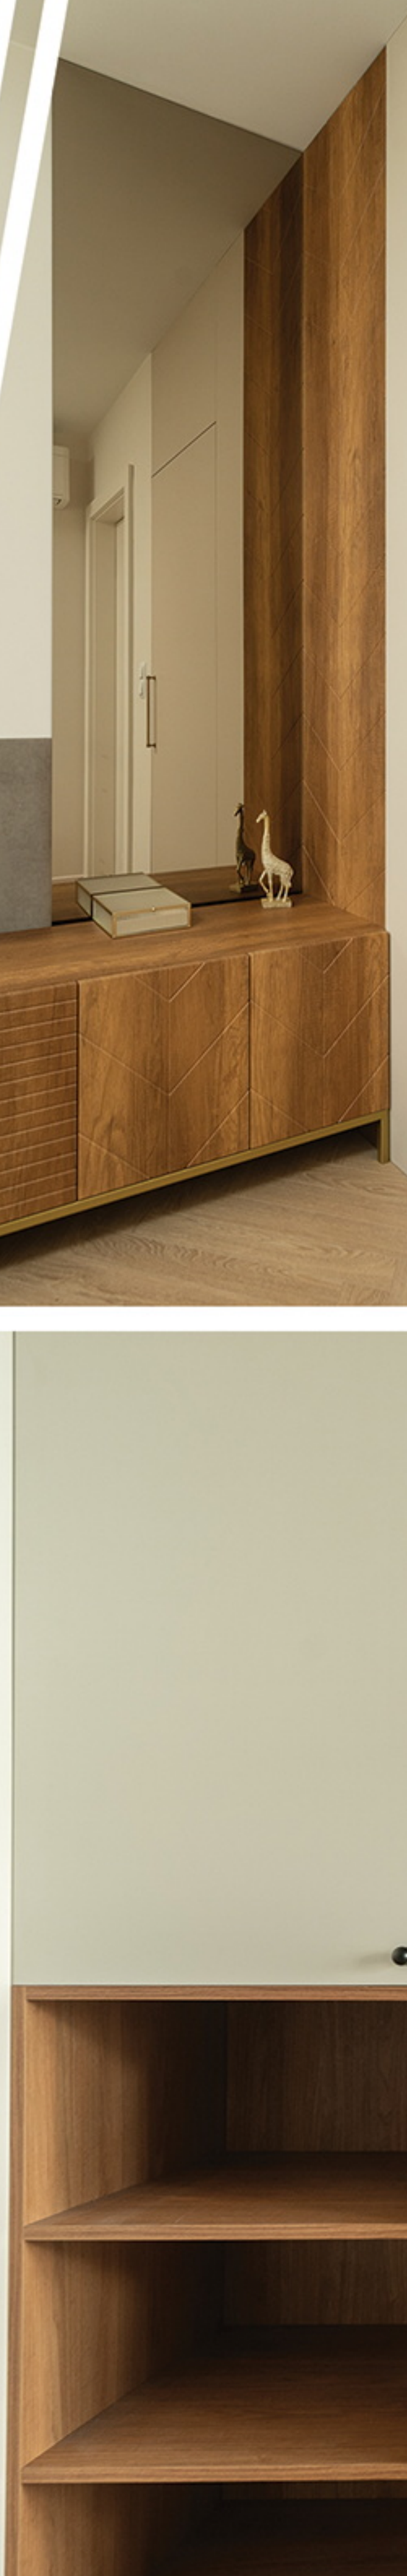

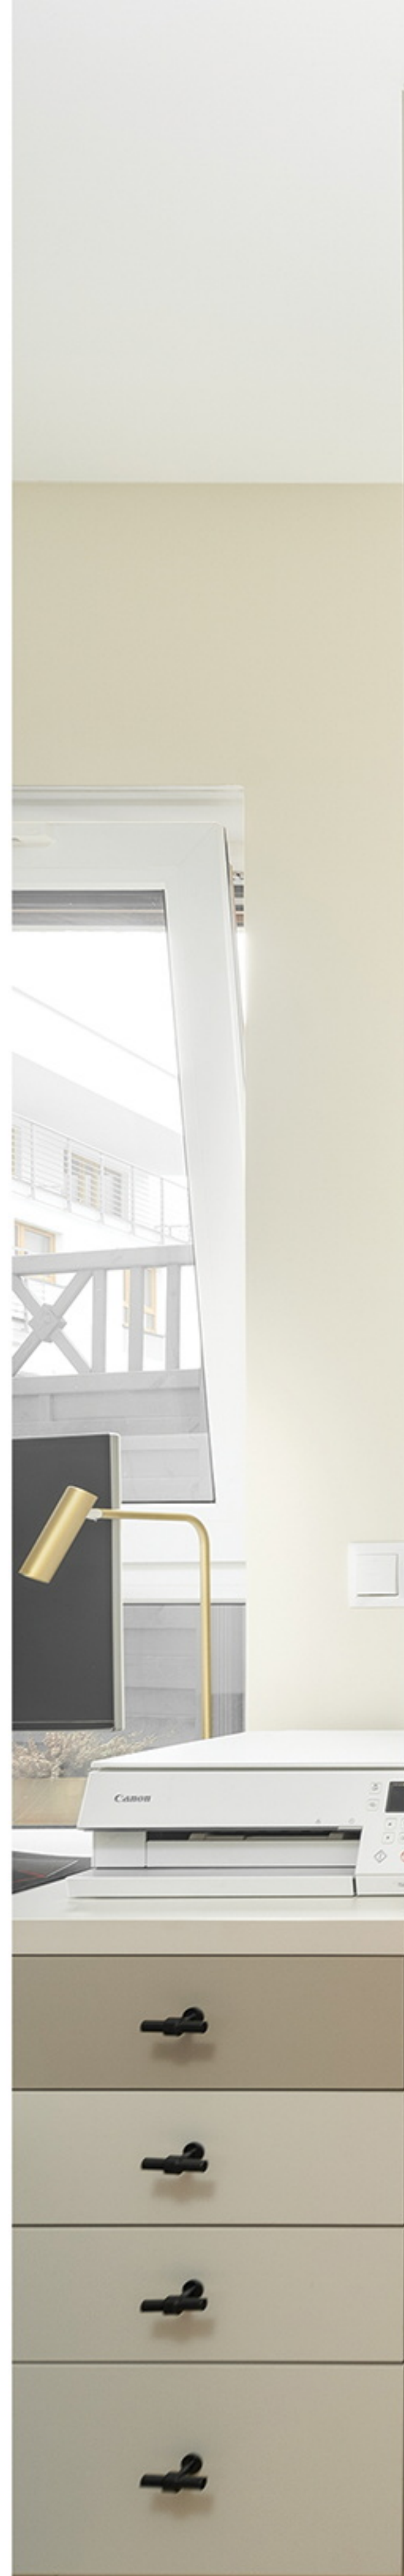

Modern beige design, interiors that are light, bright but timeless and elegant in beige and brushed brown.

42

43

44

Design with unconventional colours, with a hint of retro style.
